

Greetings Everyone,

I apologise for not writing more messages than I currently do but I hope you can appreciate the fact that I do not own a computer and that I am going through profound changes at the moment so as a result my life is in a major transition right now.

I am writing to inform you that this coming Equinox is an incredibly profound time for us all. The energies for this day are monumental to say the least, and now I understand why my upcoming talk is being held on this day. We are collectively activating the apocalypse on the 21st of March 2009. There will be exactly 4 years to the day when Mother Earth / Christ Sophia activates her planetary light body ascending herself and those of us who remain on her planetary body into the Golden Age giving birth to a whole new planetary race of Christed beings or Buddha's or Krishna's or which label you prefer.

My understanding from my greater being is that there will be many people intuitively guided to do specific energy work or sacred right ceremonies on or around the time of the Equinox. I just want to share with you that the knowing that has come through for me is that we will be activating the apocalypse together whether you are consciously aware of it or not. The time has arrived for the veil to be removed and the truth to be revealed.

The momentum is building in the lead up to my talk, and not only do I have a very important message for us all, but also a very serious message for the so called ruling elite and their shadow government. Believe me they are going to want to hear what I have to say.

The talk will be filmed and we will do our best to get it up on the net as soon as possible for all to access. Please remember we are all in this together taking responsibility for all we have been and all we have done, and that the integration of all our creations up until this point in the evolution of the universe is reaching its crescendo. As the great Terence McKenna once said, '**WE ARE** the main event!'

Love Liberation and Fortitude
