

# Harmonic Equation of Ascension

## Greetings

My name is George and I reside in the Adelaide Hills of South Australia.

In 2003 I experienced a connection with my Higher Self. It is the greater part of my Being that orchestrated my life here on our beloved Mother Earth. During that experience a knowing was revealed to me about our journey, of who we are, where we come from and where we are headed.

I've had a wide range of experiences throughout my life which have given me many points of reference and wisdom, so I know without any shadow of a doubt that the following information is from my own Being and not from any external source.

The harmonic equation that follows is the link between the spiritual and the physical. For those interested in the inner workings of this amazing process of ascension into the Golden Age, the equation is the key to these understandings.

It is what I consider to be proof of the coming changes for both Humanity and Mother Earth.

I am no expert in any particular field within the structure here on Earth known as civilisation, but there are some things I do know and I know for sure through my experiences that the major changes are upon us.

The harmonic formula which I speak of is not only the duration but the very nature of this current precession of the equinoxes.

You may have heard the saying "wheels within wheels". This is a reference to cycles within cycles. It was an attempt in ancient days to describe the workings of the Universe. All life in the Universe has a life cycle, a beginning and an end, an Alpha and an Omega.

You experience these cycles everyday of your life. We have annual cycles, monthly cycles, weekly cycles and daily cycles. We even experience within one day of our lives a whole multitude of cycles. For example shopping is a cycle. You leave the house to do your shopping (Alpha) and you return home after your shopping experience (Omega). Every experience you have be it big or small is actually a life cycle.

This precessional cycle is the one set up by the Universal Consciousness to facilitate our ascension.

This harmonic formula is the missing link and the key to understanding how our DNA is intimately connected to this cycle. This amazing set of numbers even plugs into the calendar, gravity, speed of light, duality, the Holy Trinity, exciting linear time, the Five Platonic Solids, our Light Bodies, the Golden Ratio, and much much more. This set of numbers literally plugs into all areas of life.

I also mention magic squares often and their relevance is that they are the key to understanding the construction of Atomic Structures.

Sharing this body of work is my responsibility to Humanity.

I've yet to understand and feel the magnitude of its full potential. I mentioned feel because it's not an intellectual concept on a mental level. No, this is a deep resonance of knowing and understanding through-out all levels of my Being.

This is how I know it's real, so I encourage you all to please take these numbers and play. Embark on a voyage of discovery for there are a multitude of synchronicities, links and associated equations still waiting to be revealed.

I am also aware that there are many people awaiting this information to help them accomplish their great work.

I now wish to preface the main body of information with a little message for all those experiencing the awakening and ascension process in these final years.

The beauty and grace in the  
opening of a flower  
amidst the wilderness of chaos.

On 21<sup>st</sup> March 2013 this planet, our beloved Lady Gaia (Sophia) will ascend into the Golden Age.

What follows is the Harmonic Equation for this process.

The Sphinx was built in 22819 BCE and is the key that governs the grids. It is a monument that represents the Lion King, the King of the Beasts meaning all life of the lower universes. The Lion King is the Sun and has come to this world by manifesting a body or incarnating as one of the people on many occasions. The Sphinx also is positioned at the centre of the Land Mass of the planet. You know him as the Christ.

The duration of the precessional cycle is 24,832 years with an acceleration factor of  $\frac{1}{\phi}$  or 6.18%. In the early 1900's the precession was calculated at 25,800 yrs and then recalculated to 25,920 in the 1990's. As you can see the acceleration factor is evident and when calculated on 21<sup>st</sup> March 2013 it will appear as a duration of 26,366.618 yrs. Notice  $\frac{1}{\phi}$  synchronistically appearing on the end. Anyway we all know that this reality is speeding up, it's just a matter of understanding that the Earth is spinning faster on it's axis and proportionally orbiting around the Sun faster as well.

The Sphinx also represents peace between the Bird and Serpent Tribes, and marks the beginning of the cycle to end all cycles.

The number 24,832 is a seeded fractal.

It is recursive and recursion is the mathematical expression of wisdom.

$$\begin{array}{r}
 24832 \\
 2 \times 2 = 4 \\
 2 \times 4 = 8 \\
 4 \times 8 = 32
 \end{array}$$

A Key point to understand when working with harmonics is correlation. We are not dealing with the energy of computers which is the polarity based binary system of 1's and 0's. We are dealing with the cycles of life, the cycles of celestial star systems, the individual celestial bodies and their relationship with life upon and inside them.

When the numbers are added together

$$2 + 4 + 8 + 3 + 2 = 19. \quad \sqrt{365 \text{ days}} = 19.1$$

$19 \times \pi = 59.69$  which correlates with  $60^\circ$  the angle of the equilateral triangle or the Holy Triangle of Light.

$19 \times \phi = 30.742$  correlates  $\frac{60^\circ}{2}$  and  $32^\circ$  tilt axis angle of Pythagoras.

$19 \div \phi = 11.7$  correlates with 12 months.

Also note 22819 BCE and 81918 (which appears lateral) is the gravitational acceleration of the speed of light at  $60^\circ$  latitude.

$19 \times \pi = 59.69$  also correlates with  $60^\circ$  latitude and 81918 m/sec.

Taking the equation the next step

$$8 \times 32 = 256$$

$$\sqrt{256} = 16 (\phi)$$

256 also correlates with the 2545 harmonic which is the reciprocal of the harmonic that sits between the matter and anti-matter grids of the planet measured at 1 Geodesic inch<sup>2</sup>. A balanced harmonic between polarities.

Taking equation next step along

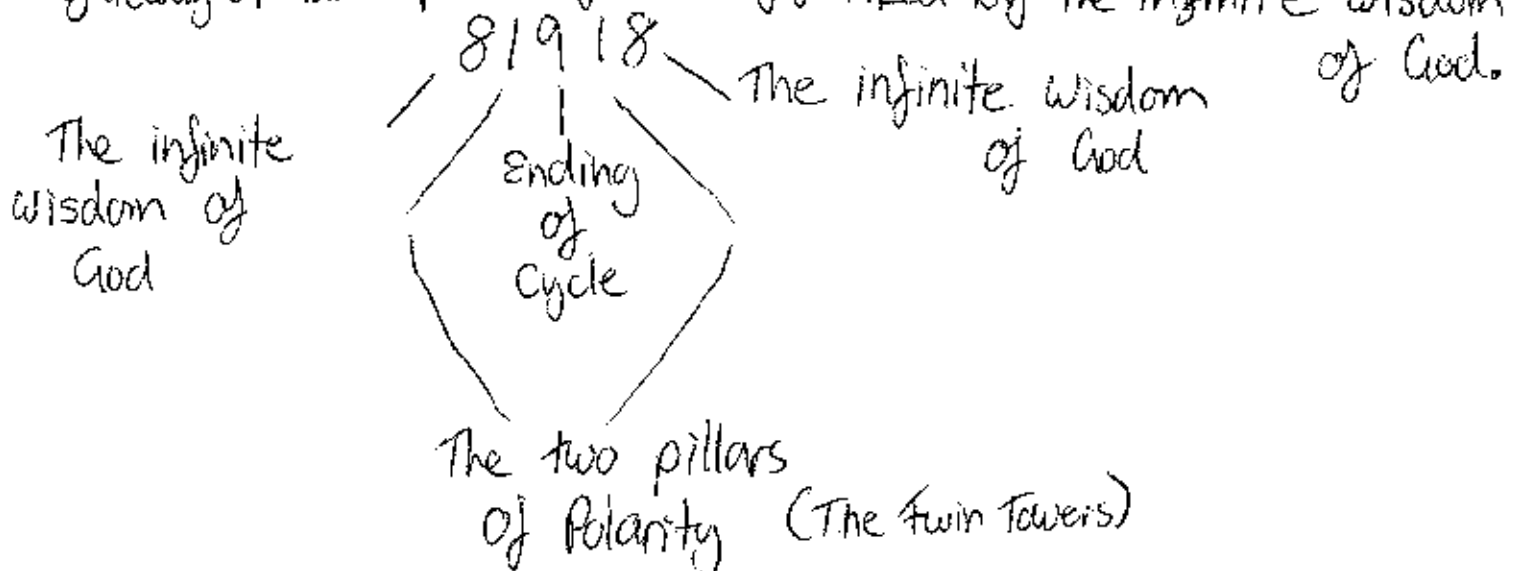

$$32 \times 256 = 8192$$

$$\frac{81}{92}$$

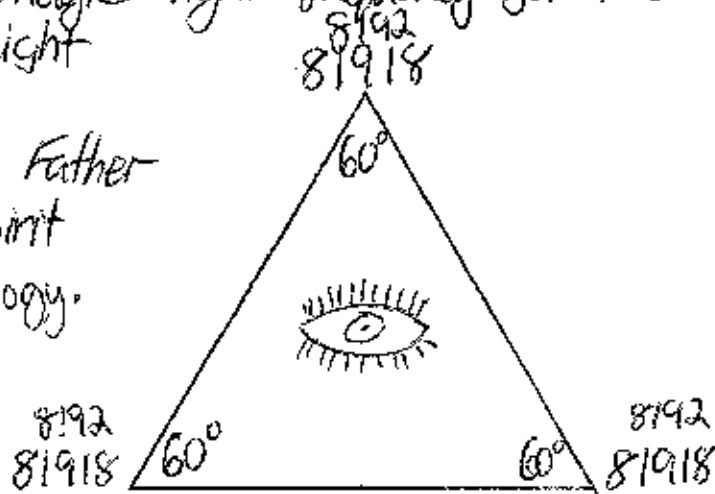

$$9 \mid 11$$

The 9/11 gateway, the ending of the cycle between the two pillars of polarity.

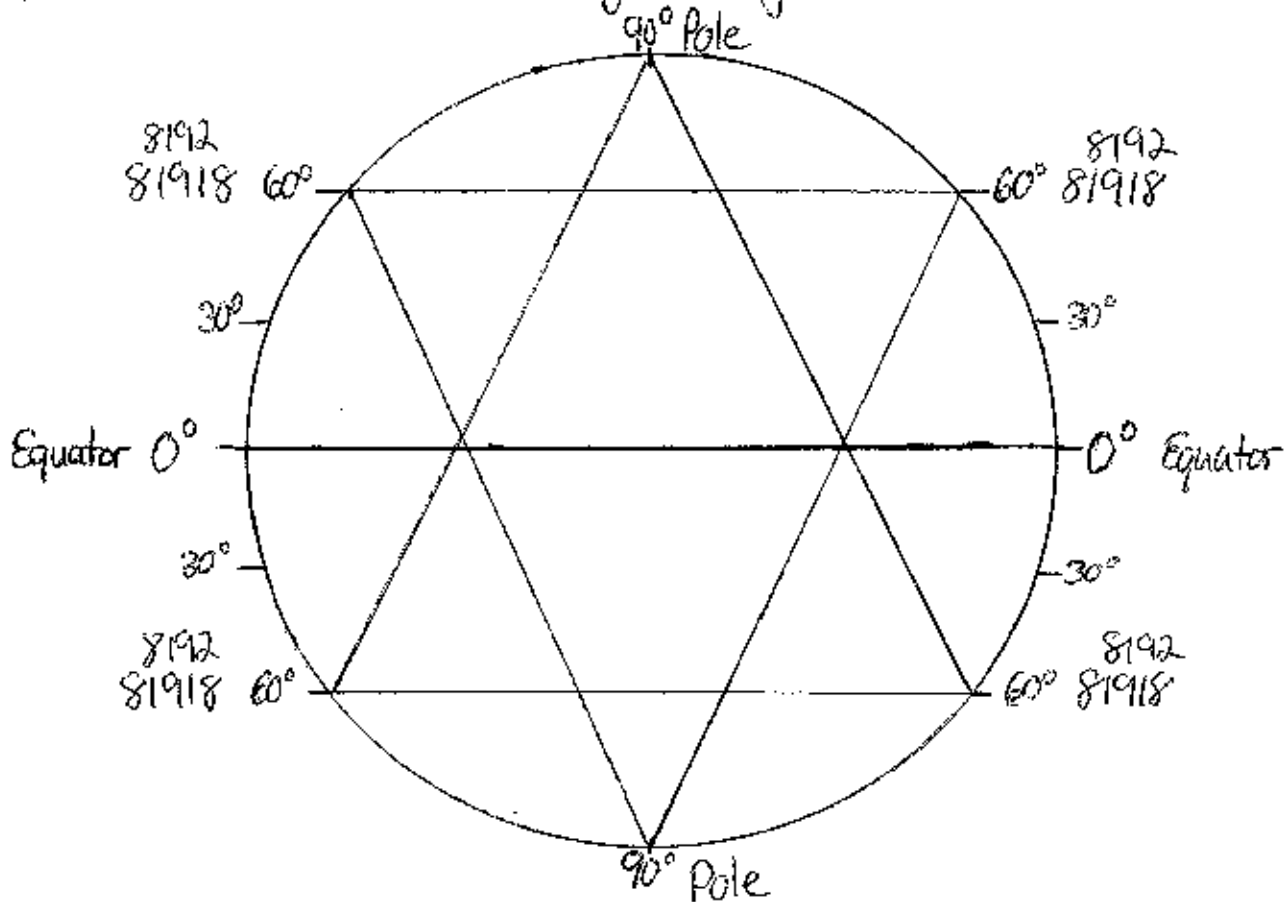

8192 correlates with 81918, the gravitational acceleration of the speed of light at 60° latitude. In other words the frequency of nesting. This is an incredibly important number. It represents the ending of the cycle through the gateway or the 2 pillars of polarity flanked by the infinite wisdom of God.

This is also the magic light frequency for the  
 Holy Triangle of Light  
 The Holy Trinity  
 The unification of The Father  
 The Son and The Holy Spirit  
 using religious terminology.

On the 21 March 2013 The Planetary Light Body,  
 the Merkabah vehicle of Lady Coea will be activated!!!

To leave linear time and go into no-time one needs to  
 exit this reality at  $90^\circ$

$$\sqrt{8192} = 90.5$$

Taking this equation further along  $\frac{256 \times 8192}{\sqrt{256 \times 8192}} = 144815$  the speed of light.

8192 also resonates with 8194 cycles/sec which is frequency of the 6<sup>th</sup> dimensional 4x4 magic square. It represents our return into the higher dimensions, our ascension into the Rising Sun from having journeyed into the separation, melancholy and despair of the lower Universes.

The reciprocal of the speed of light  $\frac{1}{144000} = 69444$

69444 is the harmonic of the Earth's gravitational field. Now to leave this gravitational field an object needs to accelerate to a speed of 25,000 miles/hr and this correlates with 24,832.

This Holographic reality is made up of 5 general frequencies. These are known as the 5 Platonic Solids. Everything that exists in this reality is constructed in the following manner:

- |                 |   |                           |
|-----------------|---|---------------------------|
| The Tetrahedron | - | Energy / Fire             |
| " Octahedron    | - | Gasses / Air              |
| " Hexahedron    | - | Masses / Mineral          |
| " Icosahedron   | - | Liquids / water           |
| " Dodecahedron  | - | Etheric / Spirit & Intent |

The intantion of the spirit enters through the Dodeca and organises the other four according to what it wishes to manifest.

Now consider 21<sup>st</sup> March 2013:

2103  
 ↓  
 2013  
 ↓

The 1 representing the whole or unity has moved away from duality the and has shifted across to the 3 representing the Holy Trinity.

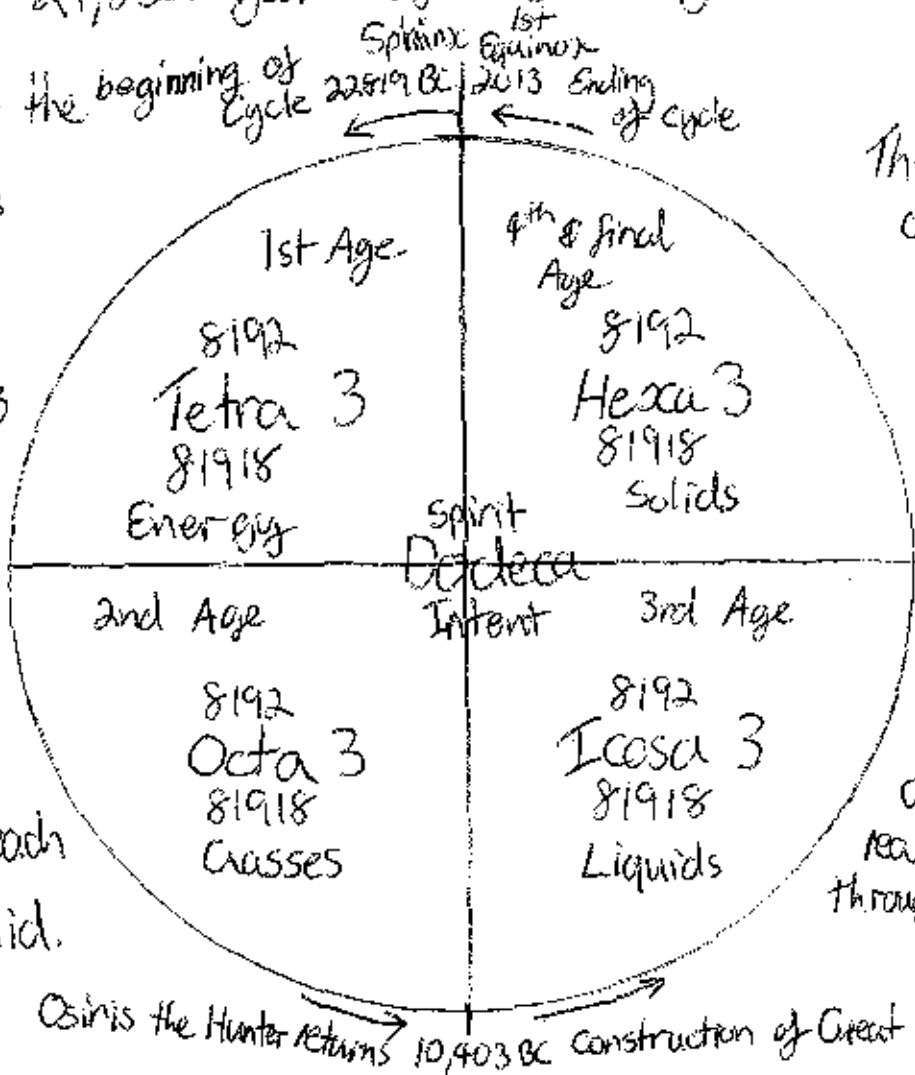

When the cycle closes on the 21<sup>st</sup> March 2013 the Golden Light of Balance, also referred to as the Christed Light will flow profusely from within every atom, from a sub-atomic level, and lift this planet Earth, Our Beloved Lady Gaia, out of this reality and into the Golden Age. After this day nothing will exist on this planet below the 5<sup>th</sup> Dimension!!!

This process can be explained diagrammatically as well through the use of an ancient universal symbol. This symbol is known to the American Indians as The Medicine Wheel, to the Australian Aborigines as The Watering Hole and to Western philosophers as The Celtic Cross.

It's important to understand that this symbol is multi-dimensional and therefore has many layers and aspects to its applications all the way up to the God-Head.

# The 24,832 year Cycle for Life Eternal

The release of the beginning of Cycle  
 Trinity  
 $2+1=3$  3  
 2103  
 2013  
 $2+1=3$  3  
 This gives us the 4 groups of 3.  
 The Holy Triangle of Light for each Platonic Solid.

The intersection of the Cross represents the Infinite or Eternal Ether.  
 The Eternal Spirit.  
 Also note the densification of reality as one journey through the cycle

Osiris the Hunter returns 10,403 BC construction of Great Pyramids.

On 21<sup>st</sup> March 2013 each Platonic Solid governed by the intent of the Eternal Spirit will be transformed or metamorphosised into a higher vibratory state.

I realise that the general consensus is that the cycle ends on December 21<sup>st</sup> 2012. This is mostly true. You see the ascension process happens in stages/steps and the 2012 stage is a major step-up in energies but not the final ascension. It is not the precession of the Solstices.

2012 has to do with the integration of our nesting Icosa-Dodeca aspects, hence the harmonic convergence in Icosa (20) Dodeca (12). But the full activation of this newly integrated Being and our complementary Environment/Eco-system will occur on 21<sup>st</sup> March 2013, Equinox.

Now please consider: 24832

(24)(8)(32)

Synchronicities for 24: 24 hours in a day

Bringing each of the Fibonacci Sequence numbers into singularity we find that the first 24 numbers,

1 1 2 3 5 8 4 3 7 18 9 8 8 7 6 4 1 5 6 2 8 1 9

repeat infinitely. Singularity is what these numbers are designed to achieve. It's the nesting of the Galactic Long Wave with the Atomic Short Wave.

Please note the last 4 digits in the sequence match perfectly with the beginning of the cycle when the Sphinx was built in 22819 BCE.

Also the only 3 dimensional shape that has 24 faces, (24 equilateral triangles of 24 Holy Trinities, 24 Holy Triangles of Light), and 24 edges is the Star Tetrahedron. That is why this precessional cycle of 24,832-yrs began in 22819 BCE and the Star Tetrahedral Light Body, (the Star of Solomon, the Star of David or Merkabah), of our Divine Mother Gaia including all life upon her will be activated on the First Equinox of 2013.

You see that is the ending of the cycle in which we pass through the gateway of duality, the two pillars of polarity (Boaz and Jachin) and enter the Golden Vortex of the Sun, a journey into the Golden Age via these numbers. Please note the two pillars are represented by the first two numbers in the sequence.

The  $24 \times 24$  magic square harmonic is 6924.

The 69 represents the Yin Yang or dualistic qualities of the 24, (The 12 female Arch Angels and 12 male Arch Angels), the management team of the Universe.

The number 6924 also resonates with 6944, the gravitational field of Mother Earth. You see the energy patterns had to be created first before our souls could GRAVITATE to this reality.

24 8 (32)

Synchronicities for 32°

32° is the sacred tilt angle of Pythagoras.

The axis angle of the Golden Rectangle is 32°, giving you a path toward centre, infinity or the infinite wisdom of God.

Tilting a Cube five times at 32° increments gives you a Dodecahedron. The conversion of matter into spirit.

$5 \times 32 = 160 \rightarrow 160$  correlates with  $\phi$   
note. 5 3 2  $\rightarrow$  11 2 3 5 8 13 21 34

The tilt angle of the Sphinx's chin is 32°.

There are 64 permutations of the DNA Codons.  $\frac{64}{2} = 32$

The magic square of 32 represents our ability, represents our ability after separation, to return home in union with God via the 32° incremental spiral of the Divine Mother Earth.

When life is being created through the process of cell division, critical mass is achieved at 32 divisions. It is at this point when individual cells merge into one mass, and the old male sacred geometrical patterns break down and are replaced with new female patterns. This is when the many become ONE.

The  $32 \times 32$  magic square harmonic is 16,400. Again this resonates with  $\phi$ , and that the 4 goes into 16, and that  $4 \times 8 = 32$  reveals that this is a nesting harmonic quality. Specifically and of utmost importance, this is a torus nesting quality. The ability to fold in on itself. To leave but then one day RETURN.

24(8)32

Synchronicities for 8:

The true shape of the number 8 is two circles touching. They represent the sacred or Divine Couple. One circle represents the Female or the anti-matter grid/cycle, and the other represents the Male or the matter grid/cycle.

They are the Twin Flames of the One Universal Consciousness who have manifested themselves into Father Sun, Mother Earth in order to personally manage and facilitate our return home after journeying into the separation of the lower universes.

Where the two circles touch is the kissing point, the starting point into unification. Sound familiar? As they begin to merge compression occurs and this leads into the Vesica Piscis, the womb of the Mother, and into Creation.

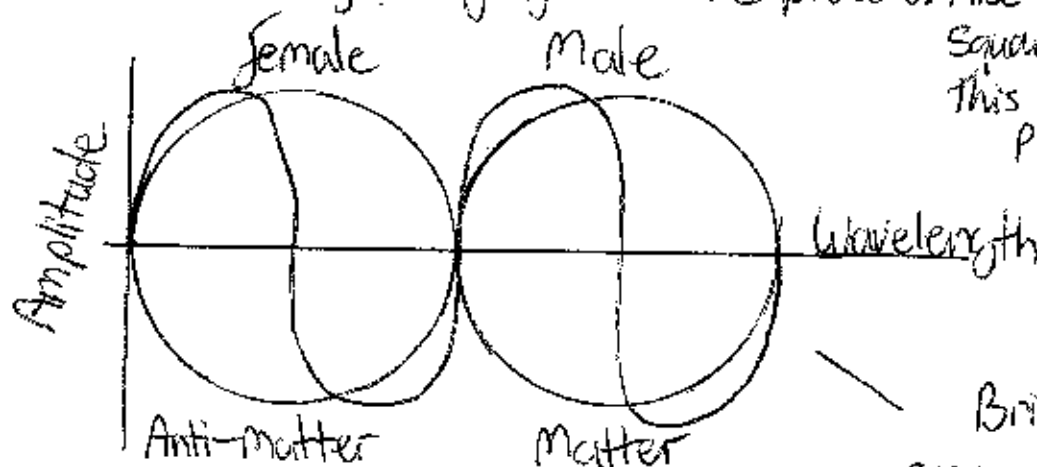

Also note that  $3 \times 8 = 24$

888 is the numerical value of Ihsous (Jesus), the spiritual Sun of God, the creator of the Universe and his management team the 24.

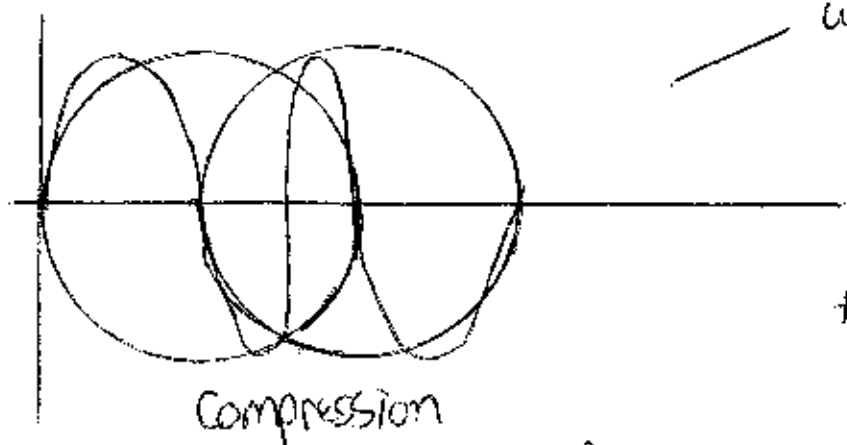

You see our Divine or Heavenly Mother and Father who together created this cycle laid out the plan of compression via the templates of the 24 & 32. The 24 was implemented by the Male outward expression and our return is now being facilitated by the female inward nurturing energy via the gentle curves of the 32° Golden Spiral.

This is why the 8 sits between the 24 and the 32, so that it (they) may govern the process. Also the 8x8 magic square harmonic is 260.

This is the Human gestation period and is a direct link to the Tzolkin of the Mayan Calendar.

Bringing life into oneness, unity in a manner which is not destructive.

Compression within the Vesica Piscis.

There is also 260 Katuns in the Mayan Longcount Calendar linking this precessional cycle with a planetary gestation period as well.

Amazing.

The 8x8 magic square is the pathway from 1 to 64, meaning the full experience of our journey into separation, and the full experience of the Human journey. This is so because of the 64 permutations of the DNA Codons. We fully experience each permutation attaining the appropriate level of wisdom for ascension.

Now consider the acceleration factor of  $6.18\%$  ( $\frac{1}{\phi}$ )

$$6.18\% \text{ of } 24832 = 1534.6176 \text{ rounded up to } 8$$

gives  $1534.618$ . This amazing revelation is the key to how this reality is speeding up because not only do we have  $\frac{1}{\phi}$  on the end we also have another link to our DNA with the 15 & the 34.

Each of the 64 swatches of the Old Family Order, before our DNA was interfered with, has each of the 64 Codon permutations adding up to 15. This is how the 3x3 magic square whose harmonic is 15 links in with our DNA, and this is why we are experiencing an acceleration in time as we are heading towards ascension.

This links our DNA with  $\phi$ . This harmonic equation links our DNA with  $\phi$ , the number 1618 or sweet 16. The process that binds our feminine and masculine into oneness. It is the number that links the 8 to the 32. It is through the dance of the sweet 16 (Venus Transits, Venus Pentacle Flower, The White Rose, from June 2004 to June 2012) that the sacred union may take place and journey into oneness via the 32° Golden Spiral into the Sun (The Stargate).  
Our Sun is "The" Stargate!!!

To merge and become one with the Golden White Light of the Solar Logos, The Christ.

Now for the 34:

The 4x4 magic square harmonic is 34.

It takes a distance of 34 angstroms along the DNA Helix for an atom to complete one full rotation. To go full circle, to complete the cycle of life, to leave but one day return home.

$$34 \times \frac{1}{\phi} = 21.012$$

the Dodeca-Icosa merge in 21<sup>st</sup> Dec 2012.

$$\frac{34}{\phi} = 21.013$$

the Golden Section spiral merging with the DNA Spiral (Helix) on 21<sup>st</sup> March 2013.

Amazing

A little more on the 15:

$15 \times \phi = 24.27$  of course the 24 refers to 24832 but the 27 is significant because it refers to the 27x27 magic square of Pythagoras.

$$15 \times \frac{1}{\phi} = 9.27$$

Once again the link to the 9 Crows of the 27x27 magic square.

As Socrates says "the 27x27 magic square of Pythagoras represents the relationship of Human life with the days, nights, months and years". This also suggests the link with the Sun.

The link to Venus mentioned earlier is as follows.

It takes Venus 13 Venusian years to create the White Rose Pentacle around the Sun. This is equivalent to 8 Earth years. We have just entered the last 5 years to the end of the cycle, and we are in the middle of an 8 year transit cycle which began in June 2004 and ends in June 2012.

The first half of that cycle was the preparations, background work and build-up with the second half of the cycle being the implementations of these plans and energy patterns. It's kind of like a cam effect with the resistance about to be overcome because the inter-dimensional levees of the dark ones can no longer hold back the tsunami of change and Universal Ascension.

Numerically it links in with the Golden Spiral 5, 8, 13. Also please note that  $\frac{5 \text{ Peril}}{3 \text{ Sun}} = 1.666$  and on the 28<sup>th</sup> of August 2008 (28-8-28) there will be exactly 1666 days to go until the cycle ends and on 15<sup>th</sup> of October there will be 1618 days to go. So get ready because the levees are about to break.

My Sovereignty celebrates  
its new found song

Love, Liberation and Fortitude.

George Kavassilas.
